Employment History

Intern   **Mar 2016 – Jul 2016**
WebVine Pty Ltd., Sydney
Responsibilities;
- Utilizing programming skills to assist colleagues to finish some tasks during the project.
- Custom branding for Intranet rebuilding
- Utilizing WordPress skills to build fancy websites based on customer specification

Projects

Learning Management System   Jiangren Pty Ltd., Sydney
- **Objective:** To develop a commercial learning management platform with basic features
- **Description:** the back-end server is based on .NET Web API with OAuth authentication, and the front-end framework is ReactJS. The whole platform has been finished with the help of senior developer, the basic features such as CRUD, sort, login and logout has been implemented in LMS.
- **Outcome**: The back-end server has been successfully deployed to Azure Web Service
- **Tools and hard skills:** .NET Web API, ReactJS, React-redux, ES6, Promise, Axios, SQL

Custom Branding for Sindhi Yoga   WebVine Pty Ltd., Sydney
- **Objective:** To individually modify the intranet based on the specification of client, which utilizing JavaScript and CSS3 knowledge to rebuild the intranet.
- **Tools:** Browser(Chrome) developer tools

Shopping Website Implementation   Deakin University, Melbourne
- **Objective:** To individually build a flower shop website with multiple functions (shopping cart, user authentication, shipping cost calculation, feedback etc.) and friendly user interface design
- **Description:** In this assignment, basic HTML page and layout are given, what I need to do is to modify it from a static website to a dynamic website, including customizing graphical user interface, building functionalities like mentioned before and also the security implementation using MD5. Mainly used PHP to implement the back end.
- **Tools: Ajax, HTML, CSS, PHP**
- **Outcome:** Successfully built the website with full functionalities implemented
- **Result:** Achieved a High Distinction in the final project
